SUMMARY

Full-Stack Developer and B.Tech Information Technology student skilled in React.js, Next.js, Spring Boot, Node.js, MongoDB, and MySQL. Experienced in building and deploying production-ready web applications, REST APIs, authentication systems, and responsive user interfaces. Passionate about software engineering and solving real-world problems through technology.

EDUCATION

Anurag University, Hyderabad
B.Tech in Information Technology

2023 – 2027

EXPERIENCE

Technical Head — 2Carvn

Jun 2026 – Present

- Independently designed, developed, and deployed the official 2Carvn platform using Next.js and Express.js.
- Lead technical operations, website maintenance, and technology-related decision making for the organization.
- Develop digital solutions supporting educational initiatives and organizational activities.
- Train and mentor students in Grades 7–9 on HTML, CSS, and web development fundamentals.

Web Development Intern — Unified Mentor

Jul 2025 – Oct 2025

- Developed responsive web applications using HTML, CSS, JavaScript, and modern frontend practices.
- Collaborated on debugging, Git workflows, deployment, and version control processes.
- Worked with real-world project workflows and deployment tools.
- Improved understanding of scalable web application architecture and software development lifecycle.

PROJECTS

Smart Hostel Complaint & Maintenance Management System

Live | GitHub

- Developed a full-stack hostel management platform using React.js, Spring Boot, and MySQL.
- Implemented secure authentication and role-based access control for students and administrators.
- Built complaint registration, tracking, and resolution workflows with administrative dashboards.
- Improved maintenance request management through centralized monitoring and status updates.

Gas Agency Management System

Live | GitHub

- Built a full-stack gas booking and management platform using MongoDB, Express.js, React.js, and Node.js.
- Implemented JWT-based authentication and role-based access control.
- Integrated booking workflows, payment options, and email notification services.
- Developed administrative features for order tracking and operational management.

Ecoyaan Checkout System

Live | GitHub

- Developed an end-to-end e-commerce checkout workflow using Next.js and React.
- Implemented server-side rendering, form validation, and state management.
- Designed responsive user interfaces with modern checkout and order confirmation flows.
- Improved user experience through optimized navigation and structured checkout processes.

Student–Teacher Appointment Booking System

Live | GitHub

- Built a MERN-based appointment scheduling platform for students and teachers.
- Implemented secure authentication and appointment management workflows.
- Developed RESTful APIs and integrated MongoDB for persistent data storage.
- Improved communication efficiency through centralized scheduling features.

TECHNICAL SKILLS

Languages: Java, JavaScript, C
Frontend: HTML5, CSS3, Bootstrap, React.js, Next.js
Backend: Node.js, Express.js, Spring Boot
Databases: MongoDB, MySQL
Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel
Core Concepts: DBMS, REST APIs, Authentication, Responsive Design, Full-Stack Development, Git Workflows

CERTIFICATIONS

- Web Development Internship Certificate — Unified Mentor
